Card Repair Service Features:

Speed:

Quick turn-around. 7-21 business days turnaround

Experience:

State-of-the-art diagnostic testing using ATE and engineers with 20+ years experience

Testing:

- ✓ Post repair burn-in process with an OEM equivalent (or better) warranty
- ✓ Multi-level testing from discreet component to full-functional

Cost Savings:

Typically saving customers 25-45%

Capabilities:

- ✓ Specialize in GE Mark I-VI, All Westinghouse WDPF, ABB Advant, Mod 300 and Procontrol, Bailey, and Siemens systems.
- ✓ Also repair Fisher-Rosemount, GE Fanuc, and many more!
- ✓ Ability to Reverse Engineer old, obsolete boards and eliminate costly new system upgrades.

What you get with every card repaired:

- • • A detailed Repair Report listing components replaced and tests performed on each card/module.

- • • Warranty Certificate guaranteeing the Quality and Workmanship of the repair.

- • • Each board shipped in an ESD-Approved container for long-term storage.

Powergenics
